ABOUT ME

I'm a software engineer based in Paraguay. I love everything related to frontend such as css, javascript, a11y and also performance. I am focused on building delightful user experiences with high-quality code.

EDUCATION

Universidad Nacional de Asuncion   **Asunción, Paraguay**
Computer Science   *Graduation Date: Jan 2025*

WORK EXPERIENCE

Tinloof   **Asunción, Paraguay**
Senior Frontend Engineer   *Sep 2023 - Nov 2023*

- Led the development of SoleRetriever's new blog MVP using Next.js and Sanity, resulting in an improvement in website performance and providing content writers with a user-friendly interface for easier content creation.
- Successfully migrated SoleRetriever's webflow blog to Sanity by creating custom scripts to scrap each article, resulting in a more efficient content structure within Sanity and reducing the time required for content updates.
- Developed and implemented a responsive website for Ambassador.io using React components (Remix) and Tinloof's builder, resulting in an improved user experience.

Belk   **Asunción, Paraguay**
Frontend Engineer   *Jun 2022 - Sep 2023*

- Fixed bugs and maintained the CSS, HTML, and Javascript of belk.com, impacting millions of users and always having accesibility and performance in mind.
- Reduced server side render time almost to half of the time by converting isml files of salesforce commerce cloud into javascript files.
- Developed integration of Conns x Belk within the belk.com site, so the users can buy Conns products and have installation and haulaway options.
- Added new components to their design system using Vue.js and web components, working closely with the design team and co-workers to deliver the best components with a great API.

Tonic 3   **Asunción, Paraguay**
React.js Developer   *Jul 2021 - Jun 2022*

- Developed a dashboard app for Avery Dennison, utilizing React.js, Material UI, and Typescript to create an intuitive user interface that received overwhelmingly positive feedback from clients.
- Implemented numerous features including charts using Victory Chart, maps with Mapbox, pagination, tables with filtering options and more - improving ease-of-use and functionality for users.
- Collaborated closely with the Product Owner and design team to develop story points and assign tickets - ultimately delivering a high-quality product ahead of schedule.

TEIXIDO S.A.   **Asunción, Paraguay**
React.js & UI Developer   *Mar 2020 - Jul 2021*

- Maintained the design system of a renowned newspaper web page using SASS (ITCSS architecture with BEM class naming) and implemented small React components to improve web performance with lazy loading patterns.
- Utilized React.js and PHP with CodeIgniter in the backend to develop and implement new features on an insurance company's web page.
- Optimized another newspaper web page through lazy loading of React components, reducing initial load time and improving download size, resulting in improved user experience and increased site traffic.
